

CLIMATE PROJECT - PLANNING SHEET

Title: Combating Climate Change

Author: Pablo Jurado

Age: 11-12

Content:

After doing "Knowing the climate change", children create posters to promote daily life routines to combat climate change.

Note: Information about climate change, its impacts, and its significance for various aspects of life can be found on the official United Nations website:

<https://www.un.org/en/climatechange/what-is-climate-change> (last accessed: 3-Dec-2024)

Development goals:

Methodological-competence: Children learn how to use Canva by doing posters with the actions to combat climate change.

Self-competence: Creating posters give them new information about how to combat the climate change making little changes in their lives.

Social skills: Children raise awareness about combating climate change in other children.

Planning:

We give students the United Nations url: <https://www.un.org/es/actnow/ten-actions> with the small actions to combat climate change

After reading it, each student choose one action and draw a sketch on the diary.

When they finish the sketch, they create the poster using Canva.

Resources:

Materials: Colour pencils, markers, paper sheets, tablets or computers, Wi-Fi.

Space: classroom.

Media:

<https://www.un.org/es/actnow/ten-actions>

Feedback:

This activity is thought to be carried out in 2 lessons, about 100min.

If you prefer, you can choose another design tool. Canva is not mandatory.

Teachers should print the best ones and exhibit them in the corridors.
